Tools Used : Microsoft Excel, Power Query, Power BI, DAX, Data Modeling

PRODUCT TYPE
Tires and Tubes

MOST RETURNED PRODUCT TYPE
Shorts

Agenda

1. Key Objective
2. Data Set and Model
3. Data Preparation
4. Dashboard Walkthroughs
5. Technical Highlights
6. Key Business Insights
7. Business Recommendations
8. Skills Demonstrated

Key Objectives

Transform Data into Actionable Business Insights

1

Transform Data

Clean And Transform
Data For Analysis

2

Key Insights

Identify Key Trends And
Growth Opportunities

3

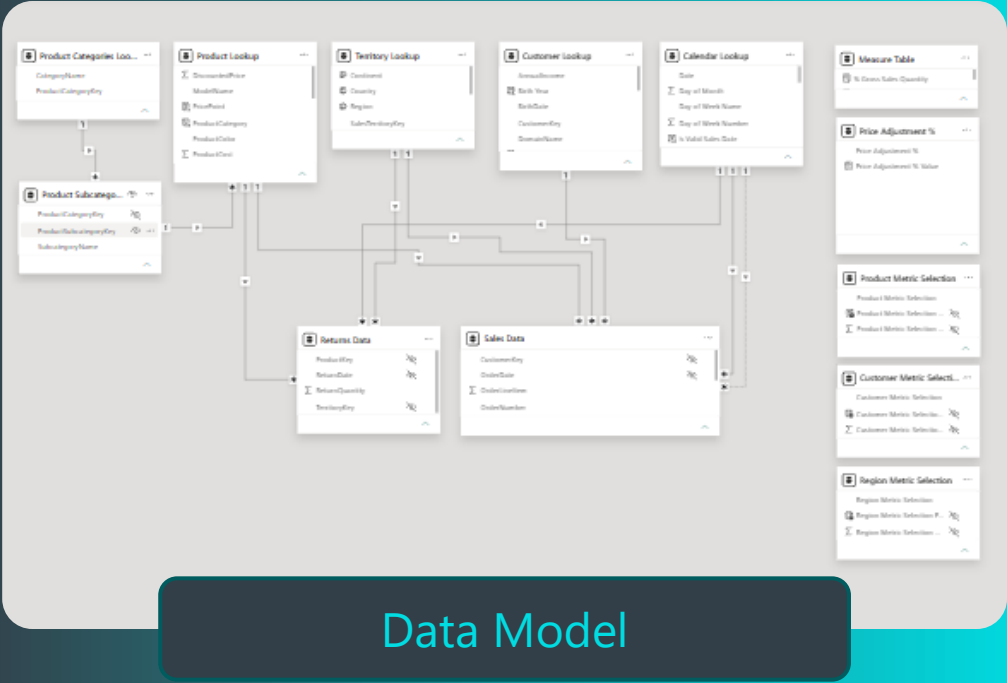

Strategic Recommendations

Use Key Insights To
Recommend Strategic
Actions

Data Set and Model

Table	Purpose
Sales	Fact Table
Returns	Fact Table
Calendar	Date Dimension
Product	Product Dimension
Customer	Customer Dimension
Territory	Geography

Implemented a Star Schema Data Model with normalized Product Dimension to preserve Product Category and Subcategory relationships.

Data Preparation

Using Power Query

Removal of
Inconsistencies

Building Calendar
Table

Creation of Required
Calculated Columns

Adjusting Data
Types

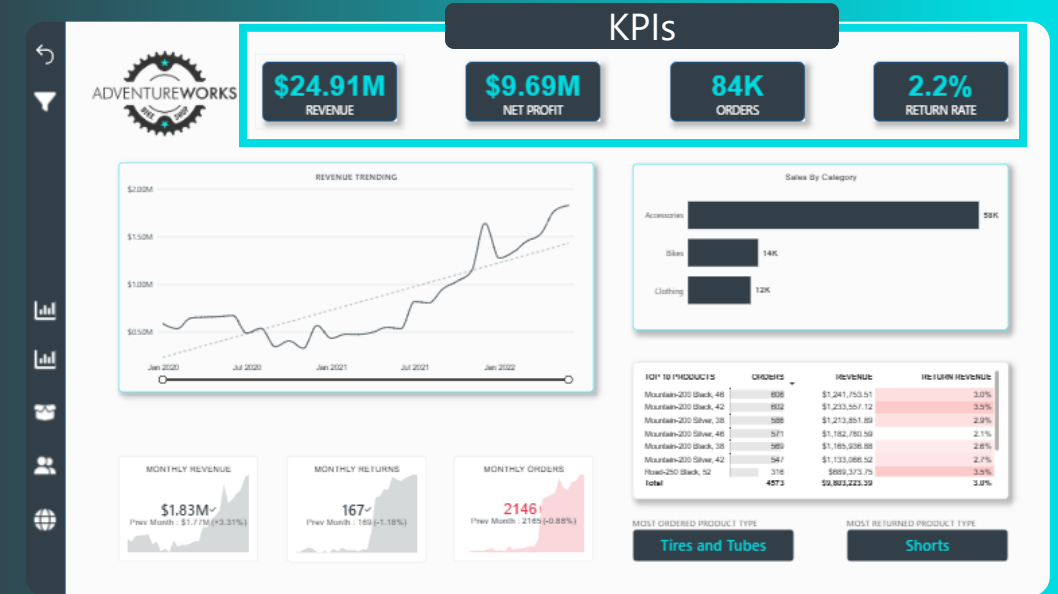

Establishment of
Relationships

Optimization of
Data Model

Dashboard Walkthroughs

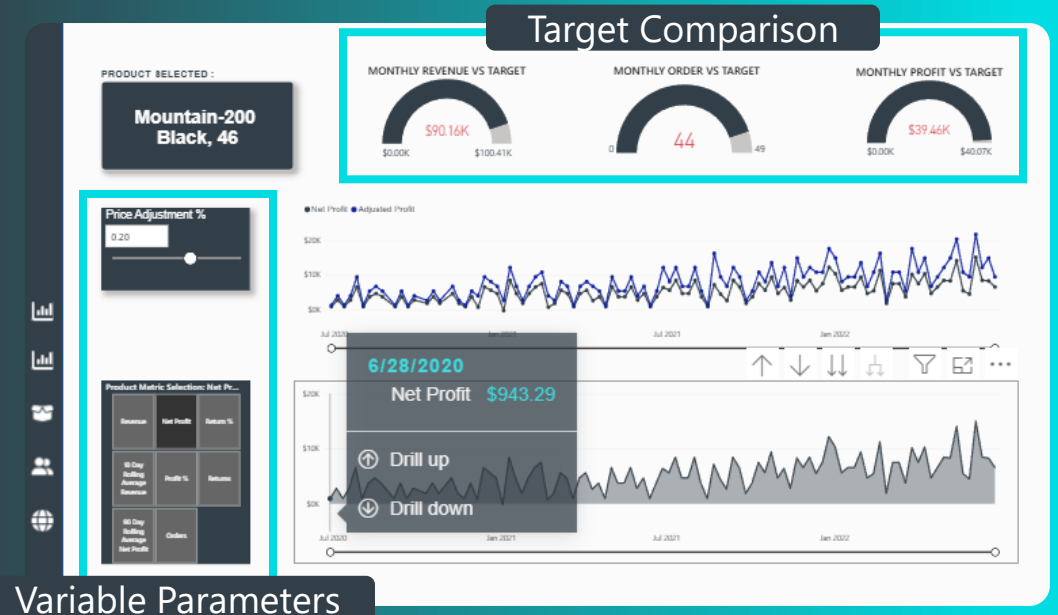

Executive Dashboard

- ✓ Overall KPIs
- ✓ Revenue Trend
- ✓ Top 10 Products
- ✓ Drill Through Options
- ✓ Sales by Product Category

Product Performance Analysis

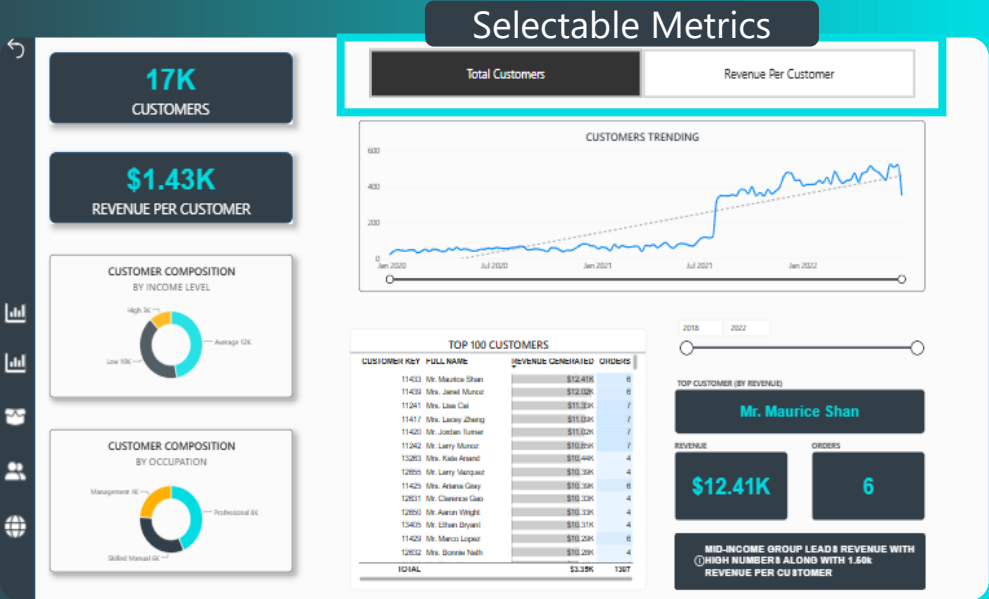

- ✓ Individual Product Performance
- ✓ Target Comparison
- ✓ Selectable Product Metrics
- ✓ Adjustable Profit % Analysis

Variable Parameters

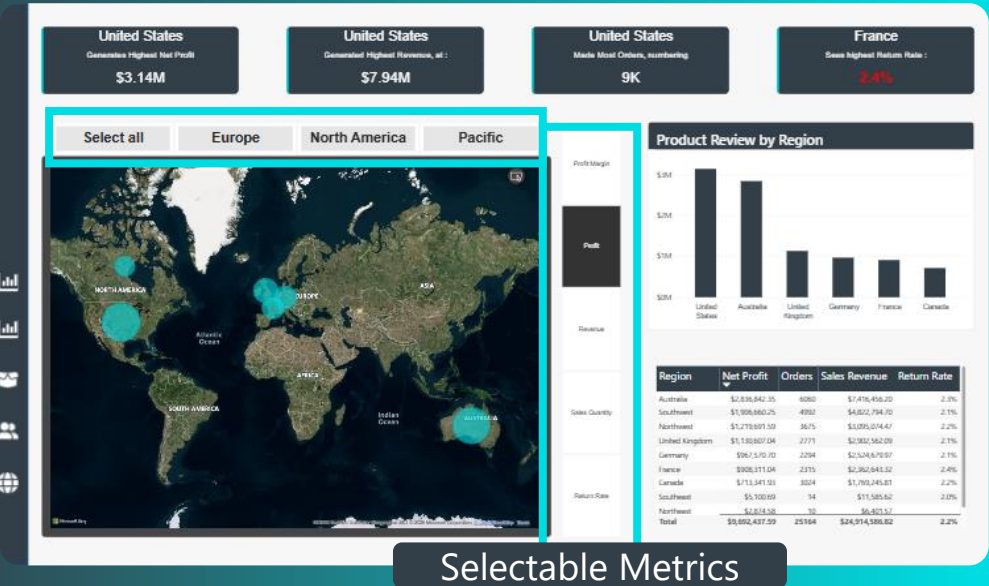

Customer Behavior Analysis

- ✓ Revenue Per Customer
- ✓ Customer Composition by Income
- ✓ Customer Composition by Occupation
- ✓ Top 100 Customers
- ✓ Trends of Selectable Metrics.

Regional Performance Analysis

- ✓ Regional KPIs
- ✓ Regional Product Performance
- ✓ Selectable Product Metrics
- ✓ Regional Comparison on Map

Insights & Recommendations

Key Business Insights

Revenue is concentrated among top products.

Accessories deliver the highest profitability.

Bikes lead sales but lag in margins.

Regional trends reveal optimization opportunities

MONTHLY REVENUE VS TARGET

MONTHLY ORDER VS TARGET

MONTHLY PROFIT VS TARGET

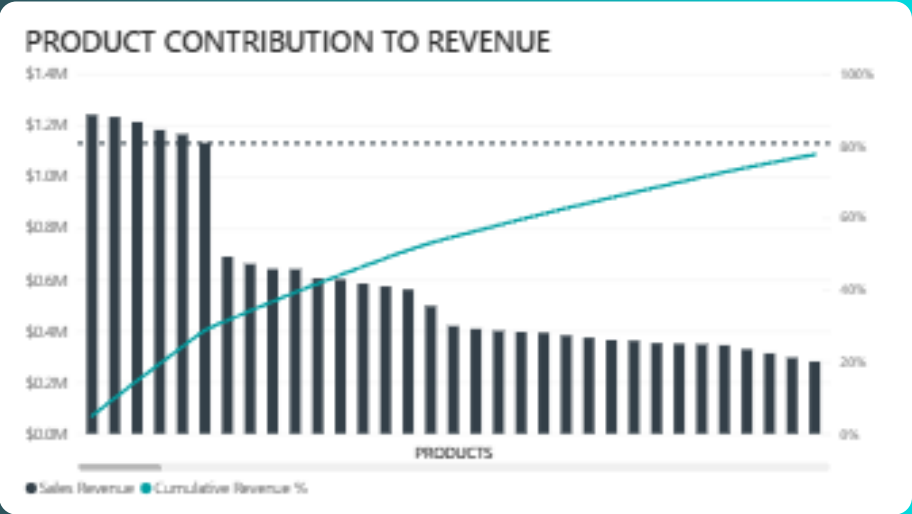

● 100.00% ● 90.16% ● 44.00% ● 39.46%

Business Recommendations

Recommendations	Business Impact
Expand investment in high-margin products	Improve Profitability & ROI
Optimize Bike pricing and costs	Improve margins on Revenue Drivers
Prioritize top-performing products	Maximize Revenue
Target regional performance improvements	Optimise under-performing markets

Project Takeaways

Technical Highlights

Time Intelligence

1. Month-over-Month Growth
2. Previous Month KPIs
3. Rolling Averages

DAX

1. CALCULATE
2. DATEADD
3. SUMX
4. PREVIOUSMONTH
5. FILTER
6. REMOVEFILTER
7. ALL

(More...)

Data Modelling

1. Star Schema
2. Data Normalization
3. Lookup Tables
4. Relationships
5. Rolling Callendar

Skills Demonstrated

Technical

-  Power BI
-  Power Query
-  DAX
-  Data Modelling
-  KPI Design
-  Dashboard Development

Business

-  Business Analysis
-  Strategic Recommendations
-  Data Story Telling
-  Executive Reporting

Project Outcome

An end-to-end Business Intelligence solution covering data preparation, modeling, DAX, dashboard development, and actionable insights.

Thank you

For your Valuable Time
